Virtual Poster Session
Friday, March 5, 2021

We are pleased to announce that we are now accepting poster proposals for consideration to the **14th annual virtual Oil & Gas High Performance Computing Conference.**

The conference is the premier meeting place for the energy industry to engage in conversations about challenges and opportunities in high performance computing, computational science and engineering, machine learning, and data science. Attended by more than 500 leaders and experts from the energy industry, academia, national labs, and IT industry, this is a unique opportunity for key stakeholders to engage and network to help advance HPC in the energy industry.

Poster submissions are limited to graduate students and postdocs. While relevance to industry is a consideration, it should be interpreted very broadly. Keep in mind that the energy industry, IT industry, academia, and national laboratories participate in this conference.

Submissions should include:
- Title of poster
- 1-2 paragraph abstract
- Authors and affiliations
- Recorded 2-3 minute lightning presentation in MP4 format. You can record your lightning talk using Zoom.
- PDF of poster slides (4-5 slides recommended).

Deadlines: Your poster title, abstract, and authors must be submitted for consideration no later than **February 21 by 5:00 PM (CDT)**. Your submission will be reviewed within 2 business days. Accepted posters will need to submit their recorded 2-3 minute lightning presentation with PDF of their poster slides by **February 28 by 5:00 PM (CDT)**.

Complimentary Registration: All accepted poster presenters must attend the conference to answer attendee's questions through the chat feature in the conference portal.

Visit **og-hpc.rice.edu** to submit your poster proposal.
